OOP Design Skills

EDUCATION

Ira A. Fulton School of Engineering, B.S. in CS 2025–2029
Arizona State University, Tempe

- Expected start in 2025

Formation Fellowship 2022 – Present
San Francisco, CA (Remote)

- Intense mentorship with engineers from top tier tech companies. Focusing on DSA and CS Fundamentals. Interview preparation and more.

WORK EXPERIENCE

Software Engineer (Open Source) May, 2023 – Present
Hack for LA, Los Angeles, CA

- Updated external link security by adding rel="noopener noreferrer" attribute in HTML file to prevent potential security risks; tested functionality and visual consistency across devices using Docker.
- Implemented HTML security updates (rel="noopener noreferrer") and verified cross-browser consistency
- Leveraged front-end (HTML, SCSS) and repository maintenance skills to support both the visual and organizational aspects of the website project.
- Collaborated with team members on both front-end and back-end tasks, following best practices for code quality and project maintenance.
